- Set entire reliability on iPrimitus cloud for highly secure data exchanges, data storage and data upkeep.
- Gain enterprise storage for Isolation of resources from public network and thick provisioning.
- Deploy multiple protection mechanisms against the Internet Threats.
- Encryption, MPLS, VPN, SSL, network layer, app layer.

Unified Infrastructure

Self Sufficient in delivering every solution and service under the head of "Cloud Computing", thoroughly supported with advanced and innovative technology backed by round-the-clock technical support for high availability.

- Choose to use private or public or hybrid cloud infrastructure with unique combination of interfaces, layers and features.
- Set out an all-inclusive cloud capable of numerous customizations, apart from enterprise-ready solutions.
- Depend on only one cloud for all your needs in the virtual world.
- Keep your hands free, while iPrimitus accelerates speed, agility and flexibility. It keeps you going the smarter way in business.

Broad & Deep Core Cloud Infrastructure Services

Compute

- Virtual Servers
- Containers
- 1-Click Web App Deployment
- Event-Driven Compute Functions
- Auto Scaling
- Load Balancing

Storage & Content Delivery

- Object Storage
- CDN
- Block Storage
- File System Storage
- Archive Storage
- Data Transport
- Integrated Storage

Database

- Relational
- Database Migration
- NoSQL
- Caching
- Data Warehouse

Networking

- Virtual Private Cloud
- Direct Connections
- Load Balancing
- DNS

What iPrimitus does for Your Business?

In simple terms, iPrimitus cloud hosting services enables you to control your cloud your way. If we had to define iPrimitus in three words, we'd mention- elastic, sizeable and secure. iPrimitus cloud server hosting uses a cluster of high specification servers, which eases out the individual installation of applications.

It allows you to start-up and deploy as per your T&C, lets you run your resources smoothly in its sophisticated algorithms, proactively activates scaling before you fall short of any resources, in other times when you are self-sufficient, it shuts down the scaling process to save your costs.
